

Call for
Papers

Carbon Emissions and Economic Transformation: Pathways to Green Growth in Post-Industrial Economies

Open for manuscript submission: December 1, 2025

Manuscript submission deadline: May 30, 2026

**More
information**

Submission instructions: Manuscripts are expected to be submitted in English language by reviewing system accessed via *Politická ekonomie – Political economy*, webpage: <https://polek.vse.cz/>.

Scope of the special issue:

This call for papers aims to examine the dual-edged nature of digital transformation, while it offers opportunities for enhanced efficiency, transparency and innovation in governance, it also poses the risk of exacerbating economic inequality by creating digital divides. The contributions may provide a deeper understanding of the mechanisms by which digital transformation affects economic inequality and propose innovative solutions to mitigate these effects. The studies may analyse case studies and empirical studies of digital governance initiatives, assess the impact of digital policies on different socioeconomic groups and propose strategies to ensure that digital advancements contribute to more equitable economic outcomes.

We welcome contributions on the following topics and related themes.

- Fiscal and regulatory instruments for decarbonization.
- **Industrial economics and decarbonization: Approaches and challenges**
- Comparative evaluations and case studies: Developing a balance between carbon emissions and economic transformation at the national and regional level.
- Economic transformation and implications for green growth
- **Green economy transition: Consequences for the service sector**
- Energy transition for green economic transformation
- Problems in the way of structural change and their consequences for green growth
